

Smart, Convenient Cabinet Protection for Any Environment

Bring safe, reliable RFID access and security to commercial, residential, and institutional cabinetry of any design.

A Revolutionary Locking System

Senseon Secure Access is a cutting-edge RFID access control system ideal for cabinetry in any design space. This concealed, keyless system gives you quick, convenient access to contents while blending seamlessly into fixtures—and improving the security of your business, facility, office, or home. Access comes via keycard, key-fob, wristband, or any other RFID credential of your choosing.

Adaptive Access Control

Senseon by being able to integrate into broader access control systems, such as Andover, Lenel, and S2. Don't want to integrate Senseon? No problem: Senseon can work independently without need of any additional software.

Superior Design

Senseon doesn't just protect—it protects while preserving your design. Have unique fixtures or older casework? Senseon seamlessly fits into either.

Total Convenience

Senseon gives you all-around convenient access. A mere tap of a key-card or RFID credential of your choice is all you need to unlock. And you can change a user's access permission in just seconds.

Peace of Mind

What happens if there's a power outage? Don't fret: If your Senseon-protected fixture is locked when an outage occurs, it remains locked.

Auto Relocking

Unsure if you locked that cabinet? There's no need to panic: Senseon can automatically relock openings in case you or one of your staff forgets to.

Designed With You in Mind

Security shouldn't conflict with your activities and design—it should enhance them. And that's just what Senseon does: This modular system uses low-profile components, including slim electronic locks, that easily fit into fixture drawers, doors, and other openings. You can even modify access with attractive and convenient design features, such as Touch-Release and Auto-Open. Be it new or refurbished cabinetry, Senseon is easy enough to install that you won't need an electrician or an IT expert to apply it to your home or business.

Look below for a few ways you can apply Senseon:

Jewelry

Senseon brings security and convenient access to fixtures without interrupting your jewelry store's elegant design.

Healthcare

Keep your patients safe and ease the burden on your staff. Senseon keeps dangerous contents from patients, gives personnel quick access, and can integrate into broader access networks or work standalone.

Finance

When it comes to finance, a wrong choice in security can cost a fortune. Senseon electronic locking systems secure important documents, cash, and other valuables with the simple tap of a keycard or other RFID credential.

Residential

Keep unwanted hands from your most precious belongings. Senseon furniture locking systems can give your cabinetry enhanced security and preserve clean, harmonious aesthetics.

Retail

Cut down on shrinkage and maximize productivity with Senseon. Senseon helps you secure fixtures from thieves, ease access for associates, and maintain a great design space.

Hospitality

Senseon allows your staff protect documents and your guests to secure valuables—while still making them quick and simple for those authorized to retrieve.

We Know Cabinetry—Inside & Out

Senseon brings you more than 50 years' experience in engineering solutions for commercial, residential, and industrial casework worldwide. Rest assured: Senseon is a partner you can trust to bring dependable secure access to your operations.

Inside Senseon

CONVENIENT EXTRAS: Features such as Touch-Release and Auto-Open ease access and provide clean aesthetics to fixture design. Access comes via keycard, keyfob, wristband, or any other RFID tool of your choosing.
